## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

---

### 1. General information

Blue Note Mining Inc. is a mineral exploration and mining company with gold and base metal exploration properties located in Quebec, New Brunswick and Ontario. The business of the Corporation is to explore and develop mining projects. The minerals being targeted by the Corporation are precious metals. Blue Note is incorporated under the Canadian Business Corporations Act and its head office is located at 1 Place Ville-Marie, suite 1511, Montreal, Quebec, Canada. The Corporation's common shares are listed on the TSX Venture Exchange under the symbol BNT.

### 2. Basis of preparation with adoption of IFRS and going concern uncertainty

These condensed interim consolidated financial statements of the Corporation have been prepared by the management in accordance with *International Financial Reporting Standards* ("IFRS"), and in accordance with IAS 34 "Interim Financial Reporting". They do not include all the information required in annual financial statements in accordance with IFRS. These condensed interim consolidated financial statements have, in management's opinion, been properly prepared using careful judgement within reasonable limits of materiality and within the framework of the same accounting policies as described in Note 2, Summary of significant accounting policies, of the condensed interim consolidated financial statements for the first quarter of 2011. These condensed interim consolidated financial statements have been prepared in accordance with the accounting policies the Corporation expects to adopt in its December 31, 2011 financial statements. Those accounting policies are based on the IFRS standards that the Corporation expects to be applicable at that time. The policies described in Note 2 of the condensed interim consolidated financial statements for the first quarter of 2011, were consistently applied to all the periods presented unless otherwise noted below.

The Corporation's consolidated financial statements were previously prepared in accordance with accounting principles generally accepted in Canada ("Canadian GAAP"). The transition date from Canadian GAAP to IFRS is January 1, 2010. Canadian GAAP differs in some areas from IFRS. In preparing these condensed interim consolidated financial statements in accordance with IFRS, management has amended certain accounting, measurement and consolidation methods previously applied in the Canadian GAAP financial statements to comply with IFRS. The comparative figures for 2010 were restated to reflect these adjustments. Certain information disclosures which are considered material to the understanding of the Corporation's condensed interim consolidated financial statements and which are normally included in annual financial statements prepared in accordance with IFRS are provided in note 4. This note also presents reconciliations and descriptions of the effect of the transition from Canadian GAAP to IFRS on shareholders' equity, net loss and comprehensive loss.

These condensed interim consolidated financial statements were prepared on a going concern basis, under the historical cost convention, which assumes the Corporation will continue its operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the ordinary course of business. The use of these principles may not be appropriate because as of September 30, 2011, there is substantial doubt that the Corporation will be able to continue as a going concern without raising additional financial resources.

The Corporation is not currently generating any revenue from its operations and for the nine-month period ended September 30, 2011, the Corporation recorded a loss of \$1,737,725. The Corporation must secure sufficient funding to maintain its existing operations for exploration programs and general and administration expenses.

Management is seeking financing through the issuance of new equity instruments to continue its activities, but there can be no assurance it will be able to do so in the future. Without new funding being available, the Corporation could be unable to continue its operations, and amounts realized for assets may be less than amounts reflected in these condensed interim consolidated financial statements.

These condensed interim consolidated financial statements do not give effect to any adjustments to the amount and classification for assets and liabilities that may be necessary should the Corporation be unable to continue as a going concern. Such adjustments could be material.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

---

### 2. Basis of preparation with adoption of IFRS and going concern uncertainty (continued)

The preparation of condensed interim consolidated financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment when applying the Corporation's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the condensed interim consolidated financial statements are disclosed in Note 3, Summary of significant accounting estimates, assumptions and judgments of the condensed interim consolidated financial statements for the first quarter of 2011.

### 3. New accounting standard issued but not yet in effect

The IASB issued the following Standards which are relevant but have not yet been adopted by the Corporation: IFRS 9, *Financial Instruments*, IFRS 10, *Consolidated Financial Statements*, IFRS 11, *Joint Arrangements*, IFRS 12, *Disclosure of Interests in Other Entities*, IFRS 13, *Fair Value Measurements*, amended IAS 27, *Separate Financial Statements*, and IAS 28, *Investments in Associates and Joint Ventures*, IAS 1 *Presentation of Financial Statements*, IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*. The Corporation has not yet begun the process of assessing the impact that the new and amended standards will have on its consolidated financial statements or whether to early adopt any of the new requirements.

The following is a brief summary of the new standards:

#### a) *International Financial Reporting Standard 9, Financial Instruments ("IFRS 9")*

International Financial Reporting Standard 9, Financial Instruments, ("IFRS 9") was issued in November 2009. It addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends, to the extent not clearly representing a return of investment, are recognized in profit or loss; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely. Requirements for financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, Financial Instruments – Recognition and Measurement, except that fair value changes due to credit risk for liabilities designated as at fair value through profit and loss would generally be recorded in other comprehensive income.

This standard is required to be applied for accounting periods beginning on or after January 1, 2013, with earlier adoption permitted. The Corporation has not yet assessed the impact of the standard or determined whether it will adopt the standard early.

#### b) *International Accounting Standard 12, Income Taxes, ("IAS 12")*

The IASB issued on December 20, 2010 an amendment to IAS 12 Income taxes ("IAS 12") related to the recovery of underlying assets. It addresses Deferred Tax: Recovery of Underlying Assets. The amendments provide an exception to the general principles of IAS 12 for investment property measured using the fair value model in IAS 40 Investment Property. For the purposes of measuring deferred tax, the amendments introduce a rebuttable presumption that the carrying amount of such an asset will be recovered entirely through sale. The presumption can be rebutted if the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits over time, rather than through sale. The exception also applies to investment property acquired in a business combination if the acquirer applies the fair value model in IAS 40 subsequent to the business combination. The amendments also incorporate the requirements of SIC-21 Income Taxes- Recovery of Revalued Non-Depreciable Assets into IAS 12, i.e., deferred tax arising on a non-depreciable asset measured using the revaluation model in IAS 16 should be based on the sale rate. The effective date of the amendments is for annual periods beginning on or after January 1, 2012. Earlier application is permitted. The Corporation has not yet assessed the impact of the standard or determined whether it will adopt the standard early.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

---

### 3. New accounting standard issued but not yet in effect (continued)

#### *c) International Financial Reporting Standard 11, Joint Arrangements (“IFRS 11”) & related Standards*

On May 12, 2011, the IASB issued IFRS 11 Joint Arrangements which supersedes IAS 31, *Interests in Joint Ventures* and SIC-13, *Jointly Controlled Entities – Non-Monetary Contributions by Venturers*. Concurrent with the issuance of IFRS 11, the IASB also issued:

- IFRS 10, *Consolidated Financial Statements*; which replaces SIC-12 *Consolidation—Special Purpose Entities* and parts of IAS 27 *Consolidated and Separate Financial Statements*.
- IFRS 12, *Disclosure of Involvement with Other Entities*;
- IAS 27, *Separate Financial Statements* (revised 2011), has been amended for the issuance of IFRS 10 for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements but retains the current guidance for separate financial statements; and
- IAS 28, *Investments in Associates and Joint Ventures* (revised 2011), has been amended for conforming changes based on the issuance of IFRS 10 and IFRS 11.

Each of the standards has an effective date for annual periods beginning on or after January 1, 2013, with earlier application permitted so long as each of the other standards are also early applied. However, entities are permitted to incorporate any of the disclosure requirements in IFRS 12 into their financial statements without early adopting IFRS 12.

*Joint control:* IFRS 11 defines a joint arrangement as an “arrangement of which two or more parties have joint control” and makes clear that joint control exists only when “decisions about the relevant activities require the unanimous consent of the parties that control the arrangement collectively.”

*Joint operations and joint ventures:* The new Standard establishes two types of joint arrangements: joint operations and joint ventures. The two types of joint arrangements are distinguished by the rights and obligations of those parties to the joint arrangement. In a joint operation, the parties to the joint arrangement (referred to as “joint operators”) have rights to the assets and obligations for the liabilities of the arrangement. By contrast, in a joint venture, the parties to the arrangement (referred to as “joint venturers”) have rights to the net assets of the arrangement.

IFRS 11 requires that a joint operator recognize its share of the assets, liabilities, revenues and expenses in accordance with applicable IFRSs while a joint venturer would account for its interest using the equity method of accounting under IAS 28 (revised 2011), *Investments in Associates and Joint Ventures*.

*Distinction between joint operations and joint ventures:* The existence of a separate vehicle is a necessary, but not sufficient, condition for a joint arrangement to be considered a joint venture.

In the absence of a separate vehicle, IFRS 11 makes it clear that the parties to the joint arrangement have direct rights and obligations to the assets and liabilities of the arrangement and hence the arrangement will be classified as a joint operation. In an arrangement with a separate vehicle, that may or may not be the case, all relevant facts and circumstances should be considered in determining whether the parties to the arrangement have rights to the net assets of the arrangement.

*Separate financial statements:* Joint operations are accounted for in the same manner in the separate financial statements as in the consolidated financial statements (i.e., the investor recognizes directly its shares of assets, liabilities, revenues and expenses related to the joint operations).

Joint ventures, like investments in associates and in subsidiaries, are accounted for in the separate financial statements of the venturer either at cost or under IFRS 9 (or IAS 39, as applicable) as permitted by IAS 27.

*Disclosures:* The disclosure requirements for entities involved with joint arrangements are established in IFRS 12. This Standard establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity’s interests in other entities.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

---

September 30, 2011

---

### 3. New accounting standard issued but not yet in effect (continued)

*Effective date and transition:* IFRS 11 is effective for annual periods beginning on or after January 1, 2013, with early application permitted (so long as IFRS 10, IFRS 12, IAS 27 (2011) and IAS 28 (2011) are adopted at the same time). When adoption of IFRS 11 requires a change in accounting, the impact of the change is calculated as at the beginning of the earliest period presented and the comparative periods are restated.

#### d) *International Financial Reporting Standard 13, Fair Value Measurements (“IFRS 13”)*

In May 2011, the IASB issued IFRS 13 *Fair Value Measurements*, which is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures.

#### e) *Employee Benefits (“IAS 19”)*

In June 2011, the IASB amended IAS 19 – *Employee Benefits*, eliminating the corridor approach to recognizing changes in actuarial gains and losses. Entities will also need to segregate changes in the defined benefit obligation and in the fair value of plan assets into three components: service costs, net interest on the net defined benefit liabilities (assets) and remeasurements of the net defined benefit liabilities (assets). The amendments also enhance disclosure about the risks arising from defined benefit plans. The amendments to IAS 19 must be applied retrospectively (with certain exceptions) for annual periods beginning on or after January 1, 2013, with early adoption permitted.

#### f) *Presentation of Financial Statements (“IAS 1”)*

In June 2011, the IASB amended IAS 1 – *Presentation of Financial Statements*, providing guidance on items contained in other comprehensive income (OCI) and their classification within OCI. The amendments to IAS 1 must be applied retrospectively for annual periods beginning on or after July 1, 2012.

The adoption of these new IFRS standards and amendments is not expected to have a significant impact on the Corporation’s financial statements.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

### 4. Transition to IFRS

The Corporation's consolidated financial statements for the year ending December 31, 2011 will be the first consolidated annual financial statements that comply with IFRS. These condensed interim consolidated financial statement, as at September 30, 2011 were prepared in accordance with IAS 34, including application of IFRS 1. The effect of the transition from Canadian GAAP to IFRS on shareholders' equity, comprehensive loss and cash flows is presented and described in this note, and is explained in detail with the following tables.

#### Exemptions applied

IFRS 1 allows first-time adopters certain exemptions from the general principal of retrospective restatement. The Corporation applied mandatory exceptions and certain optional exemptions. The following exemptions and exceptions were adopted by the Corporation as of January 1, 2010.

#### IFRS optional exemptions – January 1, 2010

**Business combination:** IFRS 1 provides the option to apply IFRS 3 "Business Combinations" prospectively from the date of transition (January 1, 2010) or to choose a date from which the business combinations will be restated. The Corporation elected to prospectively apply IFRS 3. The acquisition of X-Ore on January 19, 2010 did not have any impact at the time of the transition to IFRS, as the Corporation had early adopted section 1582 "Business Combinations" which is harmonized with IFRS 3.

**Stock-based compensation:** The Corporation has elected to use the transition exemption available to not retrospectively apply the IFRS 2 calculation method to any share options granted after November 7, 2002 and/or vested before January 1, 2010. At the transition date no material adjustments were identified.

#### IFRS mandatory exceptions – January 1, 2010

**Estimates:** All estimates previously made by the Corporation management under Canadian GAAP were not revised for application of IFRS.

**Derecognition of financial assets and liabilities:** Financial assets and liabilities that were derecognized before January 1, 2010 in accordance with its previous Canadian GAAP shall not be recognized in accordance with IFRS.

#### Reconciliations of Canadian GAAP to IFRS

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

---

### 4. Transition to IFRS (continued)

#### Reconciliations of Canadian GAAP to IFRS (continued)

##### Adjustments and reclassification notes

**1) Flow through common shares:** The Corporation renounces tax deductions relating to resource expenditures that are financed by the issuance of flow through shares for the benefit of its shareholders, as permitted by the tax legislation. Currently there is no specific IFRS guidance related to the accounting and reporting of these arrangements and as a result, the Corporation has adopted a policy that is consistent with the guidance as outlined in SFAS 109. On the completion of the subscriber agreement, the proceeds are recorded as an asset with the share capital being increase by the fair value of the shares issued using representative market prices and the difference is reflected as a liability in the statement of financial position. On the renunciation of the eligible expenditures to the shareholders, the liability is reversed; the deferred tax liability is recognized as a deferred tax expense in the statement of income (loss).

**2) Presentation changes:** The transition to IFRS resulted in numerous financial statement presentation changes "Reclassification". These reclassifications have been identified in the previous tables of reconciliation. These reclassifications have no impact on the final shareholders' equity position of the Corporation. Reclassifications as per IFRS requirements are summarized as:

- **a)** Revenue income; is now presented after operating earnings
- **b)** Finance expenses; which included interest on long term debt, other financial charges and realized and unrealized loss (gain) on disposal of marketable securities are presented after the operating earnings
- **c)** Expenses by function; the statement of loss and comprehensive loss now presents expenses by function.
- **d)** Unrealized loss (gain) on available for sale marketable securities are presented under other comprehensive loss due to a re-classification of the marketable securities from held-for-sale under Canadian GAAP to available for sale under IFRS in accordance with IFRS 39.

##### Others adjustments considered;

**Stock-based compensation:** Stock options issued by the Corporation to his directors, managers and employee have a specific vesting schedule which is treated differently under IFRS compared to Canadian GAAP. The Corporation has reviewed the Canadian GAAP stock-based compensation calculation methods and adjusted the methods to take into account the required compliant changes. As previously mentioned in the IFRS optional exemptions, the Corporation has elected to applied IFRS 2 only to equity instruments that were applied at the time of transition (January 1, 2010) but that were not entirely vested at this time. At the transition date no material adjustments were identified.

**Business combination:** As previously mentioned in IFRS optional exemptions, the Corporation applied the exemption in IFRS 1 for business combinations. The acquisition of X-Ore on January 19, 2010 did not have any impact at the time of the transition to IFRS, as the Corporation had early adopted section 1582 "Business Combinations" which is harmonized with IFRS 3.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

### 5. Acquisition of X-Ore Resources Inc.

Effective January 19, 2010, all of the outstanding common shares of X-Ore Resources Inc. (“X-ORE”) were acquired by 9216-4706 Quebec Inc., a wholly-owned subsidiary of the Corporation. The transaction took the form of an amalgamation between X-ORE and a wholly-owned subsidiary of the Corporation in exchange for the Corporation’s common shares, subject to certain conditions.

The Corporation granted shareholders of X-ORE 0.50 common share of the Corporation for each X-ORE common share outstanding for a total of 43,017,349 Corporation common shares. Subject to their terms and conditions, 3,337,142 X-ORE warrants and 2,050,000 X-ORE stock options were exchanged for warrants and stock options of the Corporation entitling the holder thereof to receive upon their exercise such number of the Corporation common shares based upon the exchange ratio, in lieu of common shares of X-ORE.

The Corporation performed an assessment of the fair value of the identifiable assets and liabilities acquired. Management’s estimates of fair value are based on independent appraisals and valuations. There are three generally accepted valuation approaches in the mining industry; a) income approach, b) market approach and c) cost approach. The process of determining the fair value of the identifiable assets and liabilities was completed as of the date of issuance of our audited consolidated financial statements and the amounts assigned to the assets and liabilities are final.

This transaction was valued at \$7.3 million and was accounted for under the requirements of IFRS 3 (Business Combinations), the transaction was accounted for under the purchase method and the results of operations of X-ORE have been included in the consolidated statements of loss, comprehensive loss and shareholders’ deficit as of January 19, 2010.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

### 6. Interest in a joint venture

As a result of the acquisition of X-ORE, the Corporation entered into a joint venture agreement with Critical Elements Corporation (“CRE”), a public corporation, (formerly First Gold Exploration Inc.), to perform development and exploration expenses on the Croinor property. Each Corporation holds an interest of 50% and X-ORE was appointed as operator. In relation with the agreement, all expenses must be incurred by the joint venture and all profits, costs, expenses, responsibilities, obligations and risks of the joint venture enterprise will be shared in proportion of their respective undivided interest. The Corporation’s interest in joint venture is accounted for by the proportionate consolidation method.

### 7. Consideration receivable

On March 18, 2010, the Corporation and Amex Exploration Inc. (“Amex”) entered into a definitive agreement pursuant to which Amex acquired all of outstanding shares of X-Ore International Inc., the wholly-owned subsidiary of X-ORE that holds mining assets and conducts exploration activities in Mexico through its subsidiary Minerales X-Ore SA de CV.

The consideration for the transaction consists of staggered cash payments totaling \$200,000, the issuance of 7,000,000 Amex common shares and 1,000,000 common share purchase warrants of Amex to be exercisable over a period of 24 months following their issuance. In addition, Amex assumed all of X-Ore International and Minerals X-Ore SA de CV obligations and liabilities. At term, the Corporation will receive, net of selling costs of \$5,881, consideration valued at \$1.9 million as follows:

	<b>\$</b>
Consideration receivable	<b>1,900,491</b>
Received	<b>(1,500,000)</b>
	<b>400,491</b>
Staggered consideration receivable	<b>487,387</b>
	<b>(86,896)</b>

For the three months ended September 30, 2011, gain on consideration receivable amounted to \$17,268.

As of September 30, 2011, staggered consideration receivable was composed of the following:

Date	Staggered cash \$	Staggered shares \$	Staggered warrants \$	Total \$
December 31, 2011	-	460,387	-	460,387
<b>Current portion</b>	-	<b>460,387</b>	-	<b>460,387</b>
<b>Long-term portion (1)</b>	-	-	<b>27,000</b>	<b>27,000</b>
<b>Total receivable</b>	-	<b>460,387</b>	<b>27,000</b>	<b>487,387</b>

(1): Long-term portion of the consideration receivable is included in “Other non-current assets”.

Receivable from related party	-	-	313,242
	<b>129,545</b>	<b>196,735</b>	<b>631,715</b>

### 10. Reclamation deposits

As at December 31, 2010, the Corporation has invested \$105,177 in term deposits in accordance with the current financial guarantee requirements set forth by the *Ministère des Ressources naturelles et de la Faune* of the province of Quebec for future site restoration costs at the Croinor mining site. As updated mine closure plans are submitted to and approved by this government body, the related financial guarantee will be adjusted accordingly. The term deposit bears interest at 1.35% (3.5% in December 31, 2010 and January 1, 2010), maturing in September 2012.

According to the joint venture agreement, the Corporation has recorded an amount of \$52,589, representing its 50% interest in the Croinor property (*note 6*).

### 11. Funds reserved for exploration

	September 30, 2011	December 31, 2010	January 1, 2010
	\$	\$	\$
Funds issued from flow-through private placement	5,282,690	3,812,890	700,000
Less: Deferred exploration expenses	(3,570,532)	(1,223,381)	(402,102)
Total outstanding flow-through commitments	1,712,158	2,589,509	297,898
Plus: Deferred exploration expenses in accounts payables and accrued liabilities	159,082	108,209	18,992
Funds reserved for exploration	1,871,240	2,697,718	316,890
Less: Funds used for current operating purposes	(1,079,290)	(104,092)	-
Plus: Funds provided by operations	-	-	256,088
	<b>791,950</b>	<b>2,593,626</b>	<b>572,978</b>
Composed of: Cash and cash equivalent	-	-	256,088
Funds reserved for exploration	<b>791,950</b>	<b>2,593,626</b>	<b>316,890</b>

The Corporation raises flow-through funds for exploration under a subscription agreement which requires it to incur prescribed resource expenditures. These funds, which are not available for current operating purposes, and therefore reported as funds reserved for exploration.

# Blue Note Mining Inc.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

### 11. Funds reserved for exploration (continued)

As at September 30, 2011 and December 31, 2010, the Corporation made use of funds reserved for exploration for other operating purposes. The temporary use of these funds is covered by the marketable securities currently held.

During 2010, under the terms of flow-through agreements, the Corporation issued 23,121,973 flow-through shares and was required to spend \$3,112,890 on qualifying exploration expenditures. As at September 30, 2011 the amount of \$2,818,291 had been spent (which include accrued exploration expenditures of \$159,082), the balance of \$294,599 must be incurred before December 31, 2011.

During 2011, under the terms of flow-through agreements, the Corporation issued 13,531,333 flow-through shares and was required to spend \$1,469,800 on qualifying exploration expenditures. As at September 30, 2011 no amount had been spent, therefore the balance of \$1,469,800 must be incurred before December 31, 2012.

### 15. Provisions

The Corporation's provisions consist primarily of asset retirement obligations for costs associated with mine reclamation and closure activities at the Croinor property, following the acquisition of X-ORE. In determining the estimated costs, the Corporation considers such factors as changes in laws and regulations and requirements under existing permits. Based on the actual exploration program, there were no additional obligations incurred during the year. Since there is no mining activity, actual costs of \$141,825 are based on Management's estimates which are not final but accepted by the government authorities. An amount of \$105,177 has been set aside as reclamation deposits.

According to the joint venture agreement, the Corporation recorded an asset retirement obligation of \$70,913, representing its 50% interest in the Croinor property (*note 6*).

The Corporation is currently preparing an updated mine closure plan which will be submitted to the government authorities in 2012.

#### (a) Issues during 2011

On January 21, 2011, the Corporation closed a private placement of 2,333,333 flow-through shares at \$0.15 per share for gross proceeds of \$350,000 and 720,000 units at \$0.12 per unit, for a gross proceed of \$86,400, each unit being composed of one common share and one warrant which entitles the holder to acquire one common share at \$0.25 over a period of two years. In connection with the issuance of these units, the Corporation incurred costs of \$7,554. The issue generated total gross proceeds of \$436,400 and net proceeds of \$428,846. The proceeds were allocated between the components based on their estimated fair values, as follows; \$324,285 to share capital; \$34,560 to warrant account and \$70,001 to accounts payable and accrued liabilities, as a liability related to flow-through shares.

The fair value of warrants issued in January 2011, was estimated at \$0.048, calculated using Black-Scholes pricing model with the following assumptions: estimated weighted average duration of 2 years, risk free interest rate of 2.86%, forecasted volatility of 109% and no forecasted dividends.

On June 23, 2011, the Corporation closed a private placement of 6,698,000 flow-through shares at \$0.10 per share for gross proceeds of \$669,800 and 1,550,000 units at \$0.08 per unit, for a gross proceed of \$124,000, each unit being composed of one common share and one-half warrant which entitles the holder to acquire one common share at \$0.11 over a period of two years. In connection with the issuance of these units, the Corporation incurred costs of \$76,620. The issue generated total gross proceeds of \$793,800 and net proceeds of \$717,180. The proceeds were allocated between the components based on their estimated fair values, as follows; \$519,415 to share capital; \$24,025 to warrant account; \$6,290 to broker warrants and \$167,450 to accounts payable and accrued liabilities, as a liability related to flow-through shares.

The fair value of warrants issued in June 2011, was estimated at \$0.031, calculated using Black-Scholes pricing model with the following assumptions: estimated weighted average duration of eighteen months, risk free interest rate of 1.93%, forecasted volatility of 103% and no forecasted dividends.

On July 15, 2011, the Corporation closed a private placement of 4,500,000 flow-through shares at \$0.10 per share for gross proceeds of \$450,000. In connection with the issuance of these shares, the Corporation incurred costs of \$3,255. The issue generated total net proceeds of \$446,745. The proceeds were allocated between the components based on their estimated fair values, as follows; \$356,745 to share capital and \$90,000 to accounts payable and accrued liabilities, as a liability related to flow-through shares.

#### (b) Issues during 2010

On January 26, 2010, a former debenture holder of X-ORE exercised its option to convert the debenture into Corporation shares. The Corporation issued 1,200,000 common shares at \$0.125 each for a total consideration of \$150,000.

On March 16, 2010, the Corporation closed a private placement of 8,333,332 flow-through units at \$0.12 per unit. Each unit is composed of one common share and one warrant, which entitles the holder to acquire one common share at \$0.25 over a period of two years. In connection with the issuance of these units, the Corporation incurred a cost of \$103,613 and issued 833,333 broker warrants to the agent to acquire 833,333 common shares at \$0.12 per share and 833,333 broker warrants to the agent to acquire 833,333 common shares at \$0.25 per share over a period of two years. The issue generated total gross proceeds of \$1,000,000 and net proceeds of \$896,387. The proceeds were allocated between the components based on their estimated fair values, as follows; \$419,721 to share capital; \$383,333 to warrant account; and, \$93,333 to broker warrants.

The fair value of warrants issued in March 2010, was estimated at \$0.046, calculated using Black-Scholes pricing model with the following assumptions: estimated weighted average duration of 2 years, risk free interest rate of 2.34%, forecasted volatility of 105% and no forecasted dividends.

### 16. Shareholders' equity (continued)

#### (b) Issues during 2010 (continued)

On June 8, 2010, the Corporation closed a private placement of 5,270,307 flow-through units at \$0.13 per unit. Each unit is composed of one common share and one warrant, which entitles the holder to acquire one common shares at \$0.25 over a period of two years. In connection with the issuance of these units, the Corporation incurred a cost of \$110,904 and issued 527,030 broker warrants to the agent to acquire 527,030 common shares at \$0.13 per share and 527,030 broker warrants to the agent to acquire 527,030 common shares at \$0.25 per share over a period of two years. The issue generated total gross proceeds of \$685,140 and net proceeds of \$574,236. The proceeds were allocated between the components based on their estimated fair values, as follows; \$153,139 to share capital; \$126,487 to warrant account; \$31,095 to broker warrants and \$263,515 to accounts payable and accrued liabilities, as a liability related to flow-through shares.

The fair value of warrants issued in June 2010, was estimated at \$0.024, calculated using the Black-Scholes pricing model with the following assumptions: estimated weighted average duration of 2 years,, risk free interest rate of 2.51%, forecasted volatility of 105% and no forecasted dividends.

On November 3, 2010, the Corporation announced that it is maintaining its option to acquire a 100% interest in the Williams Brook gold property located in northern New Brunswick. The Corporation maintained its option on Williams Brook for a fifth year in exchange for consideration of \$10,000 cash and the issuance of 384,615 Corporation common shares, with a stated value of \$50,000, which are subject to a statutory four-month hold period expiring March 19, 2011. As part of the consideration paid on the transaction, the Corporation issued 384,615 common shares at \$0.13 per share.

On December 22, 2010, the Corporation closed a private placement of 9,518,334 flow-through shares at \$0.15 per share for gross proceeds of \$1,427,750 and 7,254,166 units at \$0.12 per unit, for gross proceeds of \$870,500, each unit being composed of one common share and one warrant which entitles the holder to acquire one common share at \$0.25 over a period of two years. In connection with the issuance of these units, the Corporation incurred a cost of \$233,114 and issued 1,174,075 broker warrants to the agent to acquire 1,174,075 common shares at \$0.20 per share over a period of two years. The issue generated total gross proceeds of the \$2,298,250 and net proceeds of \$2,065,136. The proceeds were allocated between the components based on their estimated fair values, as follows: \$1,378,553 to share capital; \$348,200 to warrant account; \$52,833 to broker warrants and \$285,550 to accounts payable and accrued liabilities, as a liability related to flow-through shares.

The fair value of warrants issued in December 2010, was estimated at \$0.048, calculated using Black-Scholes pricing model with the following assumptions: estimated weighted average duration of 2 years, risk free interest rate of 2.86%, forecasted volatility of 109% and no forecasted dividends.

#### (c) Stock option plan

The Corporation has a stock option plan (the "Plan") authorizing the Board of Directors to grant options to directors, officers, employees and other persons providing services to the Corporation to acquire common shares of the Corporation at a price computed by reference to the closing market price of the shares of the Corporation on the business day before the Corporation notifies the stock exchanges of the grant of the option. The number of shares which may be granted to any one person shall not exceed 5% (2% for other persons) of the Corporation's outstanding common shares over a twelve-month period. The options will vest 18 months from the date of the grant and expire within 5 years, as determined by the board, with exceptions for death, termination of employment, etc. The Corporation is authorized to issue a maximum of 14,302,405 common shares under the Plan, which represents 10% of the outstanding common shares.

### 19. Capital disclosure

The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue as a going concern in order to pursue the development of its properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Corporation manages its capital structure and makes adjustments to it in response to changes in general industry conditions and its mining and exploration assets. The Corporation may choose to issue equity or debt, revise its capital expenditure program, and/or sell assets.

The Corporation's capital management objectives, evaluation measures and targets have remained unchanged over the periods presented. The Corporation manages the capital structure and makes adjustments depending on economic conditions.

The Corporation is subject to regulatory requirements related to the use of funds obtained by flow-through shares financing. These funds have to be incurred for eligible exploration expenses. The Corporation has respected these regulatory requirements.

## Notes to the Interim Consolidated Financial Statements (unaudited) – in Canadian dollars

September 30, 2011

### 20. Financial instruments and risk management

Financial assets and financial liabilities are measured on an ongoing basis at fair value or amortized cost. The disclosures in the “Financial Instruments – Recognition and Measurement” section of Note 2 of the condensed interim consolidated financial statements for the first quarter of 2011 describe how the categories of financial instruments are measured and how income and expenses, including fair value gains and losses, are recognized.

As at September 30, 2011, the classification of the financial instruments, as well as their carrying values and fair values, are shown in the table below:

	Total carrying value and fair value			Fair value hierarchy level
	September 30, 2011	December 31, 2010	January 1, 2010	
<i>Classification:</i>	\$	\$	\$	
<b>Financial assets</b>				
Loans and receivables;				
Cash and cash equivalents	-	-	256,088	Level 1
Sundry receivables (1)	29,244	129,911	500,742	Level 1
Consideration receivable	487,387	830,491	-	Level 2
Funds reserved for exploration	791,950	2,593,626	316,890	Level 1
Available for sale				
Marketable securities	1,157,000	1,020,000	-	Level 2
	<b>2,465,581</b>	<b>4,574,028</b>	<b>1,073,720</b>	
<b>Financial liabilities</b>				
Other financial liabilities;				
Account payable and accrued liabilities	982,751	1,206,071	464,602	Level 2
	<b>982,751</b>	<b>1,206,071</b>	<b>464,602</b>	

(1) Excluding taxes receivable

The Corporation has determined the estimated fair value of its financial instruments based on appropriate valuation methodologies. The estimated fair value amounts can be affected by the use of different assumptions or methodologies. The methods and assumptions used to estimate the fair value of financial instruments are described below:

- Loans and receivables: The carrying amount of the cash and cash equivalent, sundry receivables, consideration receivable and funds reserved for exploration is a reasonable approximation of their fair value due to the short-term nature of these financial assets.
- Available-for-sale financial assets: The marketable securities have been measured using the fair value determined by reference using inputs other than Level 1 quoted prices for which all significant inputs are observable, either directly or indirectly (Level 2).
- Other financial liabilities: The carrying value of the bank overdraft, accounts payable and accrued liabilities is a reasonable approximation of their fair value due to the short-term nature of these financial liabilities.

### 20. Financial instruments and risk management (continued)

#### *Fair value hierarchy*

Financial instruments recognized at fair value on the consolidated statement of financial position must classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurement. The fair value hierarchy levels are as follows:

- Level 1: quoted prices (unadjusted) observed in active markets for identical assets or liabilities;
- Level 2: valuation techniques based on inputs other than quoted prices included in level 1, that are either directly or indirectly observable;
- Level 3: valuation techniques with significant unobservable market inputs.

#### ***Risk management of financial instruments***

The Corporation is exposed to various risks arising from financial instruments. The following analysis provides a measurement of risks as at September 30, 2011, December 31, 2010, and January 1, 2010.

#### *[i] Credit risk*

The Corporation's financial assets are cash and cash equivalents, sundry receivables, consideration receivable, funds reserved for exploration and reclamation deposits. The Corporation's maximum exposure to credit risk of as at September 30, 2011, December 31, 2010, and January 1, 2010 is the carrying value of its financial assets. The Corporation manages credit risk by maintaining bank accounts with reputable banks and financial institutions and investing only in highly liquid securities that are traded on active markets and are capable of prompt liquidation. Financial instruments included in sundry receivable, consist of taxes receivable from government authorities and receivable from non-related corporations. Also included in financial instruments, are consideration receivable from a non-related corporation following the disposal of properties. At this point, the Corporation has received the majority of payments and management believes that the credit risk with respect of this transaction is minimal.

#### *[ii] Liquidity risk*

The Corporation is exposed to the risk of being unable to honor its financial commitments by the deadlines set out under the terms of such commitments. As described in *note 2*, as at September 30, 2011, December 31, 2010, and January 1, 2010, the Corporation has significant liquidity risk. All of the Corporation's financial liabilities are due within one year.

Management's objective is to maintain sufficient cash to ensure that the Corporation has at its disposal sufficient sources of financing such as private financing. The Corporation also establishes budget and liquidity forecasts to ensure that it has at its disposal sufficient funds to meet its financial obligations. Obtaining additional funds make it possible for the Corporation to continue its operations and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

#### *[iii] Market risk*

##### *Securities price risk*

The Corporation holds marketable securities in certain public securities for which price fluctuations can affect the Corporation's loss. The Corporation classifies these marketable securities as available for sale where price volatility is reflected in other comprehensive loss. The Corporation closely monitors the general trends in the stock markets and individual equity movements, and determines the appropriate course of action to be taken by the Corporation.

The Corporation actually holds investments in mining public companies which are subject to fair value fluctuations arising from changes in the mining sector and currently these amount to \$1,157,000 (December 31, 2010 - \$1,020,000). Based on the balance outstanding as at September 30, 2011, a 10% increase or decrease would impact other comprehensive income (loss) by approximately \$116,000 (2010 - \$102,000).

### 20. Financial instruments and risk management (continued)

#### *Commodity price risk*

Future revenues will be highly correlated to the minerals market price. To the extent that prices increase over time, asset values increase and cash flows improve; conversely, declines in the prices directly impact value and cash flows negatively. The Corporation is not currently generating any revenues and therefore is not exposed to commodity price.

#### *Foreign currency exchange risk*

The Corporation's foreign exchange risk arises primarily with respect to the US dollar. The Corporation is not currently generating any revenues and therefore is not exposed to foreign exchange risk as commodity prices are denominated in US dollars. The majority of operating expenses are payable in Canadian dollars.

Foreign currency exchange risk arises because the amount of foreign currency cash and cash equivalents, receivables or payables will vary in Canadian dollar terms due to changes in foreign exchange rates. The Corporation does not use derivative instruments to reduce its exposure to foreign exchange fluctuations. At September 30, 2011, an amount of US\$ nil (December 31, 2010 – nil, January 1, 2010 – US\$ 11,720) is included in accounts payable.

Based on the aforementioned net exposure, and assuming that all other variables remain constant, one cent rise or fall in the Canadian dollar against the other currencies would not have a significant impact on the net earnings of the Corporation.

#### *Interest rate risk*

Financial instruments that potentially subject the Corporation to significant cash flow interest rate risk are financial assets and financial liabilities with variable interest rates. The Corporation has no financial assets with this risk.

Financial assets and financial liabilities that bear interest at fixed rates are subject to fair value interest rate risk. The Corporation's cash equivalents are the only financial assets bearing fixed interest rates. The risk that the Corporation will realize a loss as a result of a decline in the fair value of its cash equivalents is limited because these investments are very short-term in duration and although classified as held for trading, are generally held to maturity. The Corporation does not believe that the results of operations or cash flows would be affected to any significant degree by a sudden change in market interest rates relative to fixed interest rates on the cash equivalents, owing to their relative short-term nature.

As at September 30, 2011, December 31, 2010, and January 1, 2010, with other variables unchanged, a 1% change in the variable interest rates would have an insignificant impact on the net loss of the Corporation.

### 21. Segmented information

Operating segment disclosure is reported in a manner consistent with the internal reporting provided to the Chief Executive Officer of the Corporation.

The Corporation has only one reportable segment. All of the Corporation's long-lived assets and operations are in one geographic location, Canada, and relate to mining development and exploration.

### 22. Commitments

In July 2010, the Corporation and CRE entered into an agreement for the acquisition, by the Corporation, of the remaining interest in the Croinor property (50%) and all of the CRE interest held in the Matchi-Manitou property, which represents a 71% interest. The consideration payable for the transaction will be staggered cash payments totalling \$100,000. In addition, at the closing of the transaction, the Corporation will pay \$2,250,000 in cash and the issuance of 17,500,000 common shares of the Corporation, to be released from escrow on a monthly basis from the closing date of the transaction over a thirty-five (35) month period. The transaction is conditional on the implementation of sufficient funding by the Corporation.

On March 29, 2011, the Corporation and CRE agreed to extend the original binding agreement announced on July 19, 2010 to May 31, 2011 in consideration of an additional payment of \$10,000.

On June 1, 2011, the Corporation and CRE agreed to extend the original binding agreement announced on July 19, 2010 to December 31, 2011 in consideration of additional monthly payments of \$10,000 until December 31, 2011. As of November 11, 2011, the Corporation had met its commitment for the entire amount of \$195,000.
