

## NEW BRUNSWICK EXPLORATION

Gold Projects: 2,094 claim units (450 sq km)

### Recent gold discoveries on surface or in shallow drill intersections at Williams Brook

Gold-bearing quartz veins:

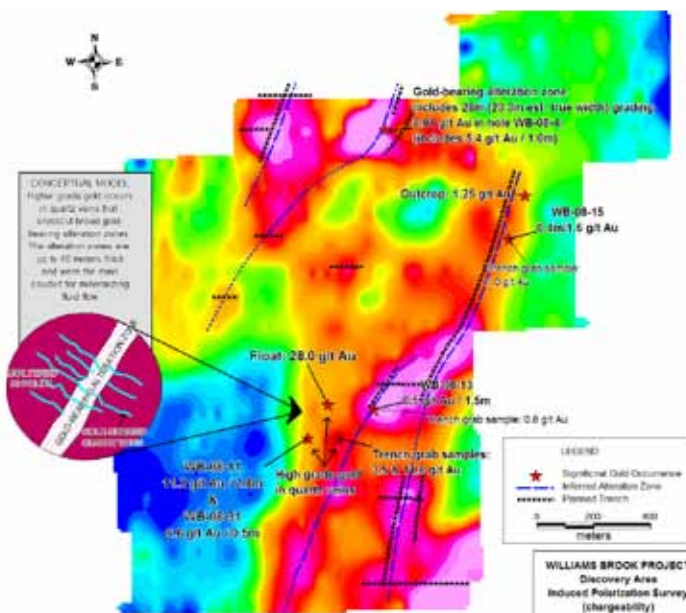

- WB-08-11: 2.8m (true width not known) @ 11.16 g/t gold
- Includes 0.5m @ 24.1 g/t gold
- Visible gold in drill core
- WB-09-31: 0.5m (true width not known) @ 6.5 gt gold

Gold-bearing alteration zones:

- WB-08-03: 38.0m (25.0m est. true width) @ 0.72 g/t gold
- Includes 9.0m (5.9m est. true width) @ 2.10 g/t gold
- WB-08-04: 28.0m (23.3m est. true width) @ 0.91 g/t gold
- Includes 1.0m (0.8m est. true width) @ 5.44 g/t gold

Numerous gold occurrences over 1200 x 600 meter area also include:

- Up to 28 g/t gold in float
- Up to 14 g/t gold in trenches (grab sample)
- Gold-bearing alteration zones interpreted to extend >2km
- Further trenching/drilling planned to test alteration zones
- Trenching/drilling planned to determine potential for high grade quartz veins crosscutting the alteration zones that remains relatively untested along strike
- Surveys planned to follow alteration zones along strike beyond the current work area
- Work at Williams Brook has mainly focused on the discovery area – further property reconnaissance work planned

### Regional New Brunswick Gold Projects:

- Upsalquitch Gold Project - Includes 1,941 claim units (422 sq km) where preliminary till geochemical surveys have identified significant anomalies with up to 356 ppb gold; follow up and reconnaissance programs are planned
- Bubar Brook - Targeting historical gold geochemical anomalies

### Bathurst Mining Camp Properties

- 536 claims (96 sq km) held by Blue Note, mainly targeting base metal massive sulphide deposits (i.e. Brunswick- or Caribou-type deposits)
- Massive sulphide discovery at Armstrong Project in 2008 included 8.3 meter intersection with 3.62% Zn, 1.46% Pb, 0.29% Cu and 32.3g/t Ag over 3.0 meters

Arthur Hamilton, P.Geo., Regional Manager, Blue Note Mining Inc., is a Qualified Person and has reviewed the technical information contained in this document.
